

THE PROJECT

"HABM: The Holocaust of All. Battle of the Memory"

The present project, whose main objective is to bring to the memory of EU citizens the Nazi extermination of PwDs, is in line with the general objective of giving citizens the cultural and historical instruments so that they may take part in constructing a united and democratic Europe in which diversity is a value which enriches, rather than a negativity to be hidden or eliminated. The construction of individual or collective identity, is based on the remembrance and historical reconstruction of the events.

The project, therefore, preserving the remembrance of a tragic event, will enable a group of European citizens (students, teachers, PwDs, representatives of the Institutions, etc.) by sharing and exchanging experiences, opinions and values, they may learn from history and operate to construct an increasingly democratic and inclusive future in Europe in which the existence of all, in respect of the diversity of each individual, is guaranteed.

Through the various actions, the project will, moreover, contribute to strengthen the participation in the democratic life of the EU by starting processes of individual and social empowerment.

Please confirm presence before the
