<b>Curriculum (eventuale)</b>	<b>Inclusion and Psychological growth</b>
<b>Tipologia di borsa</b>	Ex DM 630/2024
<b>Titolo del progetto</b>	Lo studio del linguaggio applicato all'ambito delle energie rinnovabili: uno studio sulla narrazione della "transizione energetica" nei media e il suo impatto sulle abitudini degli italiani
<b>Referente Scientifico</b>	Gian Piero Turchi
<b>Email Referente Scientifico</b>	<a href="mailto:gianpiero.turchi@unipd.it">gianpiero.turchi@unipd.it</a>
<b>Descrizione del progetto</b>	The energy transition and the sustainable production are central themes of PNRR second Mission (Green Revolution and Ecological Transition) whose aim is to promote a transition toward renewable energy solutions with low/zero environmental impact. In line with this target, this research project aims to study how public opinion about renewable and non-renewable energy is formed. This will allow to combine business innovation, environmental sustainability and social awareness on the topic. The research objective, more specifically, is to study the discursive modalities on which the "energy transition" storytelling is based. The assumptions of Dialogical Science constitute a further innovative element for the project, as a method to describe the use of language and its particular impact on community life. The results will be both used by the company partner involved for innovation purpose and disseminated within the community.
<b>Periodo da svolgere in impresa</b>	6
<b>Soggetto finanziatore o cofinanziatore</b>	Cafaggi & Mannelli S.r.l.
